

# CLOUD STRATEGY DEVELOPMENT

Are you ready for the Cloud? We are here to know if you are!

A Cloud strategy involves creation of high-performance teams and technologies with the right infrastructure. While there is no one-size-fits-all solution to building a Cloud-based enterprise, setting up the right roadmap with the right partner will make a world of difference.

## Our Approach:

- ✓ Business need analysis
- ✓ Cost-benefit analysis
- ✓ Cloud-native versus Cloud migration
- ✓ Cloud deployment configuration - Public/private/multi/hybrid Cloud
- ✓ Security and back-up plan
- ✓ Resources analysis for the migration

# **CLOUDLEAF'S CLOUD STRATEGY DEVELOPMENT SERVICES**

At CloudLeaf, we have the expertise to create a well-charted path to the Cloud. We set the stage with best practices built on years of working with advanced technologies. With a deep understanding of your requirements and current capabilities, we aim to make your transition to the Cloud as smooth and seamless as possible with minimal disruption.
